About Laminam by Crossville

Laminam, a brand which stands for innovative materials and unique technology, is the leader in thin porcelain tile panel production. Revolutionary technology concentrates three square meters into unbelievably thin porcelain: 3+ for interior and exterior walls and 5.6 for interior floors and exterior walls. Versatile and flexible, it is a genuine skin for contemporary architecture, and is ideal in a host of applications. Capable of anticipating lifestyle trends, accommodating the needs of design, and participating in the dialog of global architecture, Laminam and Crossville Inc. have joined together to bring Laminam by Crossville to the U.S. marketplace. Large format porcelain tile panels for interior and exterior walls and interior flooring—together, creativity is limitless.

Product Introduction

Fashion and performance driven, Laminam by Crossville clears the way for modern style and technical innovation. Laminam by Crossville is available in three collections: Foundations, Natural Inspirations, and Urban Influence. From the more traditional textures of Foundations, to stone and wood influences found in Natural Inspirations, to the beat of the city found in Urban Influence, each series in the collections is available in 1Mx3M. These large porcelain tile panels bring uninterrupted, flawless beauty to space and form.

Natural Inspiration

Kauri_ Porcelain Tile Panel LF

The Kauri tree of New Zealand is our muse for this collection. Echoing the uninterrupted grain of the Kauri's large, sturdy trunk and sharing its natural durability, these expansive, wood-look porcelain tile panels are ideal for creating custom lengths and widths—for maximum design possibilities.

Natural Inspiration

I Naturali_ Porcelain Tile Panel LF

Maximum freedom of expression and unexplored possibilities in interior design create a unique collection, which enhances the formal elegance of stone in large dimensions, with reduced thickness, easy handling and speedy application.

Opificio Mediceo_ Porcelain Tile Panel LF

The Opificio Mediceo series resurrects the incomparably precious alberese stone, no longer found in nature, in enduring Laminam by Crossville® porcelain. Now guarded in the historical archives of the prestigious Opificio delle Pietre Dure of Florence, alberese graced the residences of Italy's ancient noble classes before being coveted into oblivion.

Natural Inspiration

I Naturali Semi-Precious_ Porcelain Tile Panel LF

I Naturali's Semi-Precious grouping takes its inspiration from fine jewelry as well as fine decor. Focusing on of the most renown stones used in decorative arts, including onyx, calacatta marble, and emperador marble, the collection brims with opulence and sheen. Suitable for floor and wall applications, these "stones" have all the strength of porcelain on a grand scale.

Urban Influence

Andy_ Porcelain Tile Panel LF

Say hello to Laminam by Crossville®'s Andy. Brainchild of Japanese designer Narumiya Michio, this distinctly urban series of three-dimensional shades portrays a lively linear texture that plays especially well with dramatic lighting.

Urban Influence

Filo_ Porcelain Tile Panel LF

Technology and research into materials and style lead to the creation of a surprising texture, stemming from the image of a continually repeated glistening wire that forms a woven pattern, a shiny metal surface.

Urban Influence

Filo Romantico_ Porcelain Tile Panel LF

A marriage of unexpected textures—graphically dotted, pearlescent skins against visually soft florals inspired by Damask and Jacquard tapestries—proves opposites really do attract...with uniquely beautiful results.

Urban Influence

I Metalli_ Porcelain Tile Panel LF

I Metalli brings the look of aged metal, but with the ease of maintenance only porcelain can bring. With texture evoking diamond plate, the distressed, oxidized look is both industrial and luxurious thanks to tones of iron, brass, copper, and bronze. Changes in gloss refract light for a multidimensional surface sure to bring interest to any space.

Urban Influence

Oxide_ Porcelain Tile Panel LF

Oxide collection evokes metal that has reacted to sunlight and has been exposed to the weather over time. This collection was devised to embellish settings with character, which has surprisingly become the solution for a total look.

Laminam 5.6mm
Kauri_Beige L4451

Applications

Laminam® is suitable for many interior and exterior applications:

Building sector

Floor and wall coverings, partition and storage walls, false ceilings, surface finishes and restoration, insulated panels and tunnels.

Interior design

Surfaces of kitchen and bathroom tops, cupboards, tables, desks, doors and furnishings in general.

Shipbuilding sector

The lightness and high technical properties of Laminam make it suitable for walls of cruise ships and sports crafts.

Composite and structural panels

The porcelain tile panels can be placed on top of each other or over other materials to create extremely light and particularly resistant composite and structural panels suitable in all those cases that require high resistance and reduced weight load on the surface.

Technical Specifications

Laminam 3+ and 5.6mm

Laminam porcelain obtained by wet grinding of clayish raw materials, granite and metamorphic, feldspar-containing rocks and ceramic pigments. Compacted by a special shaping in compactor and sintering at 1200°C, with controlled firing.

Technical info

Laminam 3+

Laminam 3+ is made up of the basic tile panel with the structure reinforced with fiberglass matting applied on the back using special adhesive. Thickness: 3mm plus .5mm fiberglass mesh.

Use of Laminam 3+

- Interior and exterior wall coverings applied using mortar

Laminam 5.6mm

Laminam 5.6mm is the tile panel without reinforcing mesh, thickness 5.6mm

Use of Laminam 5.6mm

- Interior floor and exterior wall coverings applied using mortar to above, below, and slab on grade concrete
- **Satin and polished finishes require a penetrating sealer prior to grouting**

Information listed here is subject to change. Please refer to LaminambyCrossville.com for the latest, most accurate information.

Edge Finishing Techniques

Laminam 3+ and 5.6mm
Using Profiles

Laminam 5.6mm
Field Applied Bullnose

Laminam 5.6mm
Back Mitered and Epoxied

Distinctive values

Main features

Dimensions 1000x3000mm
 Perfectly Flat
 3+: 52 lbs / pc
 5.6: 94 lbs / pc

Chemical resistance

Laminam resists organic and inorganic solvents, disinfectants and detergents. It can be easily cleaned without affecting its surface characteristics; the only product that can attack the tile panels is hydrofluoric acid.

Wear resistance

Laminam is highly scratch proof and resistant to deep abrasion. The properties of the tiles remain unchanged even after intensive use and frequent cleaning.

High flexural strength

Laminam has a high modulus of rupture. 3+ is 50 MOR and 5.6 is 50 MOR which are high values. Typical porcelain value is 35-37.

Frost resistance

Laminam's average water absorption is 0.1% therefore it is frost resistant and suitable for any weather condition.

Fire resistant

Laminam does not contain organic material therefore it is resistant to fire and high temperatures. In the event of fire it does not release smoke or toxic substances.

Chromatic properties

Laminam does not contain organic pigments and is resistant to UV rays. Even if subjected to severe climate changes, the colors remain stable.

Graffiti

Laminam is a graffiti resistant ceramic surface; it is easy to clean and even the strongest paints can be removed.

Sustainable

- The use of hybrid kilns that combine gas and electricity significantly reduces CO2 emissions in the atmosphere
- Laminam has led the way to a photovoltaic system being installed on the roofs of its two Fiorano Modenese plants
- Over a year, this photovoltaic system guarantees the production of around 1,050 GWh, thereby enabling the company to produce 10% of its energy requirements
- In terms of CO2 reduction, Laminam's photovoltaic roof system eliminates the release of 525 tons of CO2 into the atmosphere annually
- Member of the Green Building Council Italia, this Italian association of manufacturing leaders strive to transform the building market towards environmental sustainability and to build livable communities. Partners of GBC Italia promote environmental, economic and social responsibility by innovating the way in which buildings are designed, built and used.

Environmental statement

Laminam is a dynamic, flexible and rapidly growing company; it's an entrepreneurial concern which makes recycling and sustainability its duty.

The revolutionary panel produced by Laminam does not neglect environmental friendliness: natural raw materials, sustainable technology, entirely recyclable products are at the heart of the company's green philosophy. Laminam is associated with the Green Building Council: created with natural materials, the tile panel does not release any substance into the environment and unbacked can be easily milled and recycled in other production cycles. Laminam porcelain tile panels are produced adopting sustainable technology which respects the entire ecosystem and is designed to reduce processing waste to a minimum and to limit the use of resources. The use of hybrid kilns that combine gas and electricity significantly reduces CO2 emissions in the atmosphere. Thanks to its large format Laminam optimizes the transport, thus reducing the emission of particulate matter which is harmful for the environment.

Moreover, Laminam has recently completed its own photovoltaic roof, a plant that today has already produced 1 GWh of energy and that in one year is expected to produce an estimated 1.387 GWh, therefore reducing the CO2 emission by 617 tons in the atmosphere and allowing Laminam to produce 15% of its energy requirements.
