The International reference standards: ANSI - ASTM **LEVIGATO**

The values of the main technical characteristics measured on our products, compared with international standards, are clearly shown and reproduced on our contractual documents (catalogs, price lists, etc.).

The values given in this document are common to groups of articles or series of our tiles and therefore are to be used as a guide for a first orientation in choosing the product. If required, the specific values for a given product and a determined supply can be provided depending on its intended use, when formally brought to our attention by notice in writing.
