IN DETAIL

Trend

20x20

*Trend is available in 5 different aleatory reliefs.

Trend Iris: High shade variation within each carton.

*Special product. Due to hand-manufactured process in velvet finish (textile), the tonality could vary from one to another. Use exclusively as wall coverings in non-humid areas. Fix with dispersion adhesives of type D1 or D2. Do not grout. In order to clean use just a slightly humid cloth and take care not to exert too much pressure. Do not mix pieces from different lots.

Special Product: Due to hand-manufactured process the caliber and tonality of these borders could vary from one to other.

Producto Especial: Este material se fabrica artesanalmente, por lo que pueden existir pequeñas variaciones en el calibre o en el tono.

Physical Vapor Deposition (PVD)

Pvd is a field in the application of nanotechnology. The process consists of depositing layers of atoms, inside a vacuum chamber, to a solid surface. The layering is produced by the condensation of a vaporized metal (such as gold, titanium, platinum etc.) over the selected surface. Advantages: High resistance to abrasion and scratches; much higher than metals applied by firing. Corrosion resistant. ISO 9227. As a general rule, any non-aggressive, pH neutral product have to be used.

El PVD es uno de los campos de aplicación de la nanotecnología. El proceso consiste en depositar capas de átomos, en una cámara de alto vacío, sobre una superficie sólida. El recubrimiento se produce por la condensación de un metal vaporizado, oro, titanio, platino, ect. sobre el material a recubrir. Ventajas: Mayor resistencia al rayado y a la abrasión que los metales aplicados por cocción. Resistente a la corrosión : ISO 9227. Para la limpieza de estos materiales deben utilizarse productos no agresivos con pH neutro.
